

## XXII Meeting of Physics 2022

Contribution ID : 124

Type : **parallels**

# Traversable wormholes, holography and strings

*Saturday, 17 December 2022 09:40 (20)*

I will explain the first realization of a traversable wormhole by Gao, Jafferis and Wall in the context of the AdS/CFT correspondence. Finally, I will mention briefly other related constructions (because of the notorious hype in the field) and recent developments that touch very close with Strings on AdS3.

**Primary author(s)** : RIVERA, Cristian (Grupo de Física Teórica, Facultad de Física, Universidad Nacional Mayor de San Marcos. Universidad de Ingeniería y Tecnología.); VARGAS, Teofilo (Universidad Nacional Mayor de San Marcos)

**Presenter(s)** : RIVERA, Cristian (Grupo de Física Teórica, Facultad de Física, Universidad Nacional Mayor de San Marcos. Universidad de Ingeniería y Tecnología.)

**Session Classification** : parallels

**Track Classification** : Fields and Cosmology
