

International Symposium on Earthquake Engineering “Enhancement of Building Technologies for Resilient Cities”

Wednesday 21 August 2019 - Friday 23 August 2019

CISMID

CISMID| Japan Peru Center for
Earthquake Engineering
Research and Disaster
Mitigation

 

International Symposium on Earthquake Engineering
UNESCO-IPRED Regional Event

“Enhancement of Building Technologies
for Resilient Cities”

PARTNER: 

 AMSTARD
PERU - JAPON

21-23 AUGUST 2019

MORE INFORMATION:
WEB: cismid.uni.edu.pe
cismid.eventos@uni.edu.pe

30th Anniversary of the Structural Laboratory
33rd Anniversary of CISMID-FIC-UNI

 

Book of Abstracts

Contents

2011 Tohoku Eq. & Nankai Trough Eq./Tsunami	1
A New Seismic Response Control Technique for Buildings using Block and Tackle	1
A large-scale E-Defense shaking table test with pile foundations	1
Assessment Strategy of School Complex using VISUS Methodology	1
Comparison of factors to determine design seismic actions between ISO 3010, BSL of Japan, Eurocode 8 and IBC & ASCE7 of U.S.	1
Current trends and issues on multi-hazard early warning systems. Focus on the challenges for the integration of earthquake early warning systems	1
Damage Limit States for Confined Masonry Walls Based on Experimental Test	1
Design and construction of masonry structures according to European regulations	2
Development of fragility curves of Japanese buildings based on the 2016 Kumamoto earthquake	2
Evolution of Seismic Resistant Regulations in Peru	2
Intelligent Infrastructure, The Next Steps	2
Observed Wave Propagation by Strong motion registers during Lagunas Earthquake 26/5/2019	2
Seismic Reliability on Civil Engineering Structures	2
The IGP and the challenge to implement early warning systems for earthquakes and volcanic eruptions in Peru	3
The importance of the Structural Accumulated damage due to Earthquakes in the Anti-Seismic Design	3
Towards the Joint Estimation of Seismic and Tsunami Risk with Methods Based on Earthquake Rupture Physics	3
UNESCO's contribution to Disaster Risk Reduction	3

8

2011 Tohoku Eq. & Nankai Trough Eq./Tsunami

Shoichi Ando^{None}

9

A New Seismic Response Control Technique for Buildings using Block and Tackle

Taiki Saito^{None}

11

A large-scale E-Defense shaking table test with pile foundations

Koichi Kusunoki^{None}

10

Assessment Strategy of School Complex using VISUS Methodology

Edgar Peña^{None}

3

Comparison of factors to determine design seismic actions between ISO 3010, BSL of Japan, Eurocode 8 and IBC & ASCE7 of U.S.

Yuji Ishiyama^{None}

13

Current trends and issues on multi-hazard early warning systems. Focus on the challenges for the integration of earthquake early warning systems

Jair Torres^{None}

17

Damage Limit States for Confined Masonry Walls Based on Experimental Test

Carlos Zavala^{None}

16

Design and construction of masonry structures according to European regulations

Author(s): Andreas Maurial^{None}

Co-author(s): Detleff Schermer

15

Development of fragility curves of Japanese buildings based on the 2016 Kumamoto earthquake

Fumio Yamazaki^{None}

12

Evolution of Seismic Resistant Regulations in Peru

Javier Pique^{None}

5

Intelligent Infrastructure, The Next Steps

Ruben Boroschek^{None}

2

Observed Wave Propagation by Strong motion registers during Lagunas Earthquake 26/5/2019

Jorge Alva¹

¹ *National Engineering University of Peru*

Open ceremony conference

18

Seismic Reliability on Civil Engineering Structures

Enrique Bazan^{None}

6

The IGP and the challenge to implement early warning systems for earthquakes and volcanic eruptions in Peru

Hernando Tavera^{None}

14

The importance of the Structural Accumulated damage due to Earthquakes in the Anti-Seismic Design

Mario Rodriguez^{None}

7

Towards the Joint Estimation of Seismic and Tsunami Risk with Methods Based on Earthquake Rupture Physics

Jorge Crempien^{None}

4

UNESCO's contribution to Disaster Risk Reduction

Takeo Fukui^{None}
